Orange County Voting Systems Test Proves Accuracy

SANTA ANA – October 18, 2005 – Accuracy testing of Orange County's voting system was completed today for the November 8 Statewide Special Election and the systems proved, once again, to be 100% accurate. Law requires the test, known as the Logic and Accuracy test, to be performed prior to each election.

Logic and Accuracy tests include proofing the programming of the ballot, each ballot style and each contest position on the ballot.

"It is fantastic to see that our eSlate voting system continues to prove that it is a safe, accurate voting system," said Neal Kelley, Acting Registrar of Voters. "The voters of Orange County can count on their voting system to perform well and record their votes correctly."

The Hart InterCivic eSlate has proved to be 100% accurate in tests performed each election. The eSlate was first used in the 2004 election cycle.
